

Department of Animal Husbandry and Veterinary Services
Conducts Awareness Program on Livestock Management in
Campbell Bay

The Department of Animal Husbandry and Veterinary Services (AH&VS), Andaman and Nicobar Administration, conducted an awareness program on Artificial Insemination (AI), Semen Sexing Sorting (SSS), and bull castration on October 24, 2025, at the Veterinary Hospital, Campbell Bay. The initiative aimed to educate farmers and community leaders on modern livestock management practices to enhance productivity and animal health.

The program was attended by the Pramukh and Up-Pramukh of Campbell Bay, the Pradhan of Govind Nagar Gram Panchayat, the Up-Pradhan of Campbell Bay Gram Panchayat, and other Panchayat Raj Institution (PRI) members. Their participation highlighted the community's commitment to advancing animal husbandry techniques in the region.

Veterinary experts provided detailed information on AI and SSS methods to improve breeding outcomes and the benefits of bull castration for better herd management. The sessions emphasized practical applications to support sustainable farming and economic growth for local livestock keepers.

This program reflects the AH&VS Department's dedication to promoting scientific livestock practices in the Andaman and Nicobar Islands. The active involvement of PRI members underscores their role in disseminating knowledge to farmers. The department plans to continue such awareness programs to ensure farmers have access to essential training, aligning with the Andaman and Nicobar Administration's vision of fostering sustainable rural development and animal husbandry advancement.
